Report of Voting/Annex B

MEMBER BODY	COMMENTS	OBSERVATIONS OF THE PROJECT
AFNOR-1 (Simulog, CNES)	Test in clause 6.1 should be enhanced to treat all aspects of list_method attribute in data_definition exchange_body Proposed solution: Add use of simple_list_of element and data_definition_indentured_list_method in the data_definition_exchange_list_method	It is difficult to understand how this comment might be honored because attribute list_method of data_definition_exchange_body has a single value: an implementation must choose just one of simple_list_of_files, simple_list_of_elements or data_definition_indentured_list_method. The test case in clause 6.1 has chosen simple_list_of_files. No additional choices can be made.
AFNOR-1 (Simulog, CNES)	Test inclause 6.2 should be enhanced to treat all aspects of list_method attribute in data_definition exchange_body Proposed solution: Add use of simple_list_of element and data_definition_indentured_list_method in the data_definition_exchange_list_method	It is difficult to understand how this comment might be honored because attribute list_method of data_definition_exchange_body has a single value: an implementation must choose just one of simple_list_of_files, simple_list_of_elements or data_definition_indentured_list_method. The test case in clause 6.2 has chosen simple_list_of_elements. No additional choices can be made.
AFNOR-1 (Simulog, CNES)	Request to add a complementary test for clause 6.1 based on ARM (as an Annex)	An ARM diagram that depicts the test case in clause 6.1 already exists in Annex E (Figure E.1)
AFNOR-1 (Simulog, CNES)	Request to add a complementary test for clause 6.2 based on ARM (as an Annex)	An ARM diagram that depicts the test case in clause 6.2 already exists in Annex E (Figure E.2)
